Activity Priorities and Description

Program Key Priority Area *

Alcohol and Other Drugs

Other Program Key Priority Area Description

Aim of Activity *

This activity was previously funded under the Non-Government Organisation Treatment Grants Program (NGOTGP) and the Substance Misuse Service Delivery Grants Fund (SMSDGF). In July 2017, these programs were refocused toward increasing treatment availability in the community, to better align programs to the Drug and Alcohol program.

There are a number of key aims to this activity. These aims are:

- Strengthen organisational capacity to achieve improved alcohol and drug treatment service outcomes
- Increase access to a greater range of high quality, best practice alcohol and drug treatment services
- Reduce drug related harm for individuals, families and communities while providing for a more sustainable drug and alcohol treatment sector into the future.

To achieve the key aims of this activity, Brisbane North PHN will continue to commission existing service providers to deliver evidence based models of drug and alcohol services.

The specific aims of this activity are to:

- deliver alcohol and other drug treatment, reducing related harms for specific target groups,
- support client's treatment journeys via internal and external services, referral pathways and linkages,
- enhance service capacity to address complex physical, mental and social health needs.

Description of Activity *

Brisbane North PHN will continue to commission the service provider to deliver a range of in-scope drug and alcohol treatment services. These services include:

- Brief interventions focusing on one off crisis support, education and referral
- Initial screening and eligibility for treatment services
- Provision of tailored clinical counselling to suit client needs
- Provision of individual counselling and support for significant others of individuals with problematic substance use
- Delivery of appropriate treatment addressing negative effects of substance use and mental health services for comorbid clients
- Individually tailored, client directed case management
- Provision of psychosocial education and support to those making/contemplating changes to substance use, behaviours relating to substance use, and co-occurring mental health concerns
- Post-discharge follow-up interview.

Other activities will include facilitation of ongoing professional development for staff and developing relationships with other agencies, to enhance service capacity and support clients throughout their treatment journey.

This activity is also delivered in other PHN regions.

Activity Consultation and Collaboration

Consultation *

Brisbane North PHN consulted with a wide range of stakeholders in the development of a range of activities and for the development of the Planning for Wellbeing: A regional plan for North Brisbane and Moreton Bay focusing on mental health, suicide prevention and alcohol and other drug treatment services 2018-2023. The outcomes of this activity contribute to the success of the regional plan.

Brisbane North PHN initially inherited this contract from the Department of Health in 2017. Service providers were consulted during the transition phase to determine the parameters of service design. Providers have been engaged with the Alcohol and Drug Partnership Group and were consulted in the development of the regional plan.

Collaboration *

This activity will be implemented by Brisbane North PHN, under the guidance of the Alcohol and Other Drugs (AoD) Partnership Group.

Membership of this group is drawn from the Brisbane North region and includes Metro North Hospital and Health Service, Allied Health providers, Queensland Government agencies, the Queensland Network of Alcohol and Other Drug Agencies, funded agencies, service users and families.

- Reduce drug related harm for individuals, families and communities while providing for a more sustainable drug and alcohol treatment sector into the future.

To achieve the key aims of this activity, Brisbane North PHN will continue to commission existing service providers to deliver evidence based models of drug and alcohol services.

The specific aims of this activity are to:

- deliver alcohol and other drug treatment, reducing related harms for specific target groups,
- provide high quality alcohol and drug treatment while maintaining existing capacity
- ensure the service meets the needs of specific population groups
- support client's treatment journeys via internal and external services, referral pathways and linkages,
- enhance service capacity to address complex physical, mental and social health needs.

Description of Activity *

Brisbane North PHN will continue to commission a service provider to deliver a range of in-scope drug and alcohol treatment services. These services include:

- Develop and maintain alcohol and drug rehabilitation case management plans with identified milestones and key exit points
- Provide post-clinical rehabilitation support and post-case management exit support to clients
- Individual and community harm reduction
- Obtain client feedback about their experience of service, which will be used to inform the service model
- Culturally appropriate support, treatment and referral for young people aged 12-25, including poly drug users, people with co-occurring mental health issues and complex needs, young women, young families with children and Aboriginal and Torres Strait Islander people
- Support young people's access to clinical alcohol and other drug rehabilitation and support
- Ensure client's access to community based services during critical periods, in order to mitigate risk factors

Alcohol and Other Drugs

Other Program Key Priority Area Description

Aim of Activity *

This activity was previously funded under the Non-Government Organisation Treatment Grants Program (NGOTGP) and the Substance Misuse Service Delivery Grants Fund (SMSDGF). In July 2017, these programs were refocused toward increasing treatment availability in the community, to better align programs to the Drug and Alcohol program.

There are a number of key aims to this activity. These aims are:

- Strengthen organisational capacity to achieve improved alcohol and drug treatment service outcomes
- Increase access to a greater range of high quality, best practice alcohol and drug treatment services
- Reduce drug related harm for individuals, families and communities while providing for a more sustainable drug and alcohol treatment sector into the future.

To achieve the key aims of this activity, Brisbane North PHN will continue to commission existing service providers to deliver evidence based models of drug and alcohol services.

The specific aims of this program is to:

- Improve access to comprehensive and effective primary health care for Indigenous people in SEQ
- Improve access to drug and alcohol services through integration with the existing Indigenous primary health care assessment and care planning system by increasing the proportion of Aboriginal and Torres Strait Islander people/s:
 - o appropriately screened for alcohol, smoking and other drugs in Aboriginal Community Controlled primary care
 - o with problematic drug and/or alcohol use who are appropriately managed (e.g. intervention and referral)

Description of Activity *

Brisbane North PHN will continue to commission a service provider to deliver a range of in-scope drug and alcohol treatment services. These services include:

- Identification of clients with complex needs, particularly co-existing substance use and mental illness
- Psychological and social activities to support the treatment of clients with complex needs
- Maintaining a social health team in each participating community controlled health service for the treatment of clients with mental health and/or alcohol related issues
- Clinical supervision to social health staff
- Culturally appropriate therapeutic interventions and services for Aboriginal and Torres Strait Islander clients
- Support for clients to access appropriate psychological measures as part of a care coordination process
- Implementation of appropriate structures and processes for case management and referral
- Routine drug and alcohol screening and brief intervention in primary and community care settings
- Cognitive behavioural interventions and social therapy tailored to the needs and preferences of high risk individuals and groups at risk of drug and/or alcohol related harm
- Drug and alcohol outreach support before and/or after residential rehabilitation for high risk dependent individuals.

Other activities will include facilitation of ongoing professional development for staff and developing relationships with other agencies, to enhance service capacity and support clients throughout their treatment journey.

This activity is also delivered in other PHN regions.

- Reduce drug related harm for individuals, families and communities while providing for a more sustainable drug and alcohol treatment sector into the future.

To achieve the key aims of this activity, Brisbane North PHN will continue to commission existing service providers to deliver evidence based models of drug and alcohol services.

The specific aims of this program is to:

- Support the implementation of harm reduction strategies to protect client health from alcohol and other drug use harms
- Provide a whole of system response to alcohol and other drug misuse
- Reduce harms through education and symptom management of comorbidity

Description of Activity *

Brisbane North PHN will continue to commission the service provider to deliver a range of in-scope drug and alcohol treatment services. These services include:

- Provision of accessible primary health care for clients with alcohol and other drug and mental health issues
- Provision of group education to clients regarding the effects of alcohol and other drugs and mental health
- Implementation of Life Skills programs to reinforce protective behaviours and assist clients to better handle peer pressure, budgets and health
- Implementation of the Indigenous Risk Impact Screen(IRIS)tool
- Plan and implement appropriate interventions that will reduce alcohol and other drug and mental health harm for each client
- Mental health nursing for clients with co-occurring disorders
- Deliver drug and mental health education to clients of the service designed to minimise alcohol and other drug harms
- Deliver and evaluate the alcohol and other drug brief intervention program in community counselling settings.

Other activities will include facilitation of ongoing professional development for staff and developing relationships with other agencies, to enhance service capacity and support clients throughout their treatment journey.

Activity Priorities and Description

Program Key Priority Area *

Alcohol and Other Drugs

Other Program Key Priority Area Description

Aim of Activity *

The aim of this activity is to increase the availability of alcohol and other drug (AOD) treatment services in the community. Brisbane North PHN will achieve this aim by working collaboratively with a broad range of stakeholders to commission AOD treatment services. Commissioned services will be in line with departmental guidelines and consistent with Brisbane North PHN's needs assessment.

To ensure that the aim of this activity is met, Brisbane North PHN will continue to commission a range of priority AOD treatment services across areas of identified need in the region. This will ensure that available services are used to their best effect to improve treatment rates and accessibility.

Description of Activity *

Brisbane North PHN will continue to commission the following priority service types:

- Counselling
- Post-rehabilitation support and relapse prevention
- Case management, care planning and coordination.

While our needs assessment also identified the need for mild and moderate alcohol detoxification services, given the focus of this funding and the cost of services in relation to the overall funding amount, Brisbane North PHN has decided not to commission this service type.

The commissioned service provider will specifically provide the following activities, as part of an overall stepped-care model of service delivery:

- Day program/groups
- Face to face AOD counselling

- Case management and care coordination
- Methamphetamine Assessment and Treatment Enhanced Program.

Activity Consultation and Collaboration

Consultation *

Brisbane North PHN consulted with a wide range of stakeholders in the development of a range of activities and for the development of the Planning for Wellbeing: A regional plan for North Brisbane and Moreton Bay focusing on mental health,

suicide prevention and alcohol and other drug treatment services 2018-2023. The outcomes of this activity contribute to the success of the regional plan.

In March 2016 the PHN produced the first Alcohol and Other Drugs Needs Assessment. The assessment analysed national, state and local level data to validate treatment levels and to estimate prevalence of alcohol and other drug related issues in the Brisbane North PHN region.

The needs assessment benchmarked population groups who access local level services to national and state estimates of people who have alcohol and other drug issues, along with state level data on people who receive treatment from alcohol and other drug services.

Brisbane North PHN facilitated co-design workshops in April 2016 with key stakeholders including representatives from the Hospital and Health Service, drug and alcohol service providers, mental health services, GPs, Aboriginal and Torres Strait Islander community-controlled health services, allied health and pharmacy, service users, carers and community members. Key feedback from the co-design workshops confirmed priority populations and service types for AOD treatment services. Key recommendations made by stakeholders were to support and invest in existing services to build capacity and to link these services to other initiatives for a more coordinated service system to benefit the consumer. This information has informed this plan.

Collaboration *

This activity will be implemented by Brisbane North PHN, under the guidance of the Alcohol and Other Drugs (AoD) Partnership Group.

Membership of this group is drawn from the Brisbane North region and includes Metro North Hospital and Health Service, Allied Health providers, Queensland Government agencies, the Queensland Network of Alcohol and Other Drug Agencies, funded agencies, service users and families.

Activity Priorities and Description

Program Key Priority Area *

Alcohol and Other Drugs

Other Program Key Priority Area Description**Aim of Activity ***

This activity aims to enhance service capacity, increase system integration and feed into further needs assessment and planning to address equity of access across the Brisbane North PHN region.

This aim will be achieved by the development and implementation of a range of activities that support the AOD workforce in the Brisbane North PHN region. These activities include a range of workforce training and development programs that will increase service integration and facilitate continuous quality improvement of the AOD workforce.

Description of Activity *

This activity enables alignment of activities with our priorities for increasing service delivery capacity and improving integration of treatment services in the Brisbane North region. Networks and partnerships created under the previous funding allocation will be strengthened to provide direction and advice on system integration and workforce development in the sector.

Collaboration with stakeholders across the Brisbane North region will continue, seeking consultation and input in planning and commissioning workforce development activities to best meet contemporary workforce development needs and aligned with emerging trends in alcohol and other drug treatment.

This activity will continue to focus on the implementation of the options paper developed by the Queensland Network of Alcohol and Other Drug Agencies. Activities will include:

- Maintaining practitioner and supervisor/team leader communities of practice

- Conducting action research to document existing triage, screening and waitlist management procedures
- Reviewing models of clinical communication and developing good practice resource for service providers
- Conducting a supplementary AOD workforce survey
- Mapping current clinical/practice supervision in services and facilitating the delivery of supervision training for supervisors and supervisees.

Activity Consultation and Collaboration

Consultation *

Brisbane North PHN consulted with a wide range of stakeholders in the development of a range of activities and for the development of the Planning for Wellbeing: A regional plan for North Brisbane and Moreton Bay focusing on mental health, suicide prevention and alcohol and other drug treatment services 2018-2023. The outcomes of this activity contribute to the success of the regional plan.

In March 2016 the PHN produced the first Alcohol and Other Drugs Needs Assessment. The assessment analysed national, state and local level data to validate treatment levels and to estimate prevalence of alcohol and other drug related issues in the Brisbane North PHN region.

The needs assessment benchmarked population groups who access local level services to national and state estimates of people who have alcohol and other drug issues, along with state level data on people who receive treatment from alcohol and other drug services.

Brisbane North PHN facilitated co-design workshops in April 2016 with key stakeholders including representatives from the Hospital and Health Service, drug and alcohol service providers, mental health services, GPs, Aboriginal and Torres Strait Islander community-controlled health services, allied health and pharmacy, service users, carers and community members. Key feedback from the co-design workshops confirmed priority populations and service types for AOD treatment services. Key recommendations made by stakeholders was to support and invest in existing services to build capacity and to link these services to other initiatives for a more coordinated service system to benefit the consumer. This information has informed this plan.

Collaboration *

This activity will be implemented by Brisbane North PHN, under the guidance of the Alcohol and Other Drugs (AoD) Partnership Group.

Membership of this group is drawn from the Brisbane North region and includes Metro North Hospital and Health Service, Allied Health providers, Queensland Government agencies, the Queensland Network of Alcohol and Other Drug Agencies, funded agencies, service users and families.

Activity Priorities and Description

Program Key Priority Area *

Alcohol and Other Drugs

Other Program Key Priority Area Description

Aim of Activity *

The aim of this activity is to increase the availability of AOD treatment services specifically to Aboriginal and Torres Strait Islander people. To achieve this aim, Brisbane North PHN will work collaboratively with a broad range of stakeholders to continue to commission AOD treatment services targeted to Aboriginal and Torres Strait Islander people.

The aim of this activity addresses equity of access issues for ADO treatment among Aboriginal and Torres Strait Islander people in the Brisbane North PHN region.

Description of Activity *

This activity will commission the following priority service types:

- Early intervention
- Counselling
- Post-rehabilitation support and relapse prevention
- Case management, care planning and coordination.

In Brisbane North PHN's broader needs assessment and broader activity work plan, the health of Aboriginal and Torres Strait Islander people was highlighted. Similarly, in the PHN's Mental Health and Suicide Prevention needs assessment and activity work plan, the needs of this population were highlighted and separately identified. In delivering this activity, integration with these other activities will occur.

The commissioned service provider will provide a range of in-scope treatment activities as part of an integrated social and emotional health and wellbeing approach. This includes improved psychological health and social functioning for Aboriginal and Torres Strait Islander people attending for substance misuse.

Activity Title *

General Practice Support for Drug and Alcohol Addiction Treatment

Existing, Modified or New Activity *

New Activity

Activity Priorities and Description

Program Key Priority Area *

Alcohol and Other Drugs

Other Program Key Priority Area Description

Aim of Activity *

The aim of this activity is to promote training and education grants to GPs and to support improved linkages between the primary care and alcohol and other drug treatment sectors.

Description of Activity *

Brisbane North PHN will take a collaborative approach to this activity, consulting with both RACGP and ACRRM to determine the most effective way/s to promote and support the GP training and education grants offered by the colleges. Consultation will also occur with the Queensland Health MHAOD Branch to examine ways to improve service linkages through Adis and ADCAS.

Additionally, a component of the funding will be used to support a collaborative approach by Brisbane North PHN, Brisbane South PHN, Darling Downs West Moreton PHN, Central Queensland Wide Bay Sunshine Coast PHN, Gold Coast PHN, Northern Queensland PHN, and Western Queensland PHN regarding consistent messaging in line with principles outlined in the National Framework for Alcohol and Other Drug Treatment 2019-2029 regarding the important role general practice plays in the prevention and treatment of alcohol and other drug-related health harms.

Aligned with key priorities from Planning For Wellbeing, Brisbane North and Moreton Bay's Regional Plan developed in consultation by Brisbane North PHN and Metro North HHS, and informed by recommendations made in the Engaging general practice and General Practitioners in alcohol and other drug treatment (QNADA/DPMP UNSW; 2020) report (funded by Brisbane North PHN), this may include the exploration of system change to address stigma and discrimination in general practice service provision.

Responses to the Report recommendations by the Integration, Communications and Primary Care Liaison Teams of the PHN, and the PHNs Clinical Advisory Group, will inform the activities linked to GP education.
