Follow-up allied health services for Aboriginal and Torres Strait Islander peoples who have had a health assessment

Assessment and provision of services

A person who is of Aboriginal or Torres Strait Islander descent may be referred by their GP for follow-up allied health services under items 81300 to 81360 when the GP has undertaken a health assessment (items 701, 703, 705, 707 or 715) and identified a need for follow-up allied health services.

These items provide an alternative pathway for Aboriginal or Torres Strait Islander peoples to access allied health services. If a patient meets the eligibility criteria for individual allied health services under the chronic disease management items (10950 to 10970) and for follow-up allied health services, they can access both sets of services and are eligible for up to ten allied health services under Medicare per calendar year.

Item	Name	Description/Recommended Frequency
81300	Aboriginal and Torres Strait Health Service	Aboriginal and Torres Strait Health Workers, or Aboriginal and Torres Strait Islander Health Practitioners and Allied Health Providers must have a current Medicare provider number for each location in which they practice. Maximum of 5 allied health services per patient each calendar year (in addition to the 5 services eligible from TCA 10950-10970). Services must be at least 20 minutes duration and medical notes need to reflect same. GP refers to allied health professional using a “Referral form for follow-up allied health services under Medicare for People of Aboriginal or Torres Strait Islander descent” or a referral form containing all components. One for each provider. Allied health professionals must report back to the referring GP after the first and last services. This also includes health professionals using the same clinical software, an internal process of feedback must be in place for the GP to review the medical notes and enter if any further action is required. (e.g. Recall patient, as they did not attend service or further action not required, recall patient for health assessment in 9-12 months).
